

# BPOWER 027 AGM 60Ah 640A

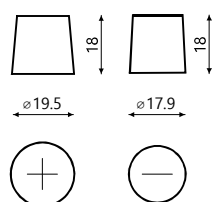

Excellent AGM series batteries are characterized by a very long service life and cyclic durability which is many times higher than in other starter batteries. The main feature of the AGM technology is the use of special separators made of a glass mat soaked in electrolyte. AGM batteries are completely sealed and maintenance-free, so they can also work inside vehicles without the risk of leakage. AGM technology guarantees the highest resistance to start-ups and partial recharges, thanks to which they are successfully used in most vehicles with the Start & Stop system and the energy recovery system.

| BASIC PARAMETERS                  |                    | TECHNOLOGY           |             |
|-----------------------------------|--------------------|----------------------|-------------|
| Nominal voltage (V)               | 12                 | Technology           | Ca/Ca VRLA  |
| Nominal capacity 20HR (Ah)        | 60                 | Performance marking  | W5-C2-V3-M3 |
| Cold cranking perform. (EN -18°C) | 640                | Separator            | AGM         |
| Recom. charging current           | 6A                 | Flame Arrestor       | ✓           |
| PHYSICAL PARAMETERS               |                    | CASE FEATURES        |             |
| Dimensions (L x W x H)            | 242 x 175 x 190 mm | Case type            | L2 DIN AGM  |
| Weight (kg)                       | 16,40              | Hold down            | B3          |
| Terminal type                     | T1                 | Handles              | ✓           |
| Case material                     | Polipropylen PP    | End venting          | ✓           |
|                                   |                    | Cell assembly layout | 0           |
|                                   |                    | Lid type             | VRLA        |
