

BPOWER

YTX10L

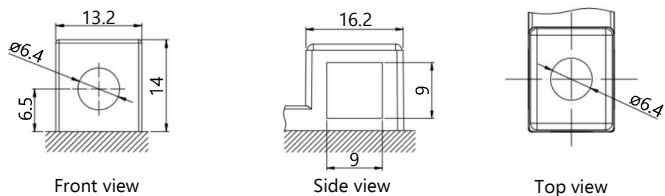

10Ah 160A

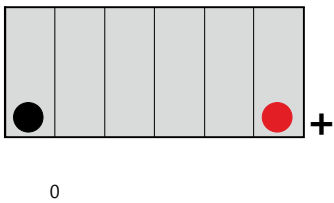

BPOWER PLATINUM series batteries are sealed and maintenance-free batteries made using AGM technology. They are used in newer generation motorcycles and in all quads, jet skis and snowmobiles. In order to maintain factory freshness, the batteries are available in a dry version with electrolyte included. Start-up takes place shortly before the battery is installed. A tightly closed battery, once filled with electrolyte, becomes completely maintenance-free.
